

CL10series

10,000 lb. capacity

- 1** Maximize service capabilities and revenue potential
- 2** Reduces stress on equalization system and increases cable life
- 3** Decreases load on bearing
- 4** Allows lift to be placed in standard service bay with 12' ceiling
- 5** Prevents vehicle damage from being raised too high
- 6** Reduces column deflection
- 7** Allows technician to disengage both columns simultaneously

The Automotive Lift Institute (ALI) certifies that the CL10 described herein complies with the applicable provisions of the American National Standards ANSI/ALI ALCTV 2006 and are Third Party Validated by the ETL Testing Laboratory.

CL10 — offset 2-stage arms

- » Wide arm sweep with excellent arm retraction and reach
- » Meets OEM recommended pick up points of most vehicles
- » Offset front arms provide single sweep spotting of virtually any vehicle
- » Lifts vehicles with a symmetric center of gravity

Versymmetric® Technology

The CL10's specially engineered Versymmetric® arms safely lift both symmetrically and asymmetrically within the same service bay.
